NOTIFICATION OF TRANSMITTAL OF  
THE INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT

(PCT Rule 71.1)

Applicant's or agent's file reference  
PA135659/PCT

IMPORTANT NOTIFICATION

International application No.  
PCT/IB 03/02985

International filing date (day/month/year)  
28.07.2003

Priority date (day/month/year)  
01.08.2002

Applicant  
CHEMICAL HOLDINGS INT. LTD et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

International Patent Classification (IPC) or both national classification and IPC F42D1/045, F42D1/045		
Applicant CHEMICAL HOLDINGS INT. LTD et al.		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
  
2. This REPORT consists of a total of 5 sheets, including this cover sheet.
 

This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of sheets.
  
3. This report contains indications relating to the following items:
  - I  Basis of the opinion
  - II  Priority
  - III  Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
  - IV  Lack of unity of invention
  - V  Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
  - VI  Certain documents cited
  - VII  Certain defects in the international application
  - VIII  Certain observations on the international application

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/IB 03/02985

**I. Basis of the report**

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

**Description, Pages**

1-7 as originally filed

**Claims, Numbers**

1-6 as originally filed

**Drawings, Sheets**

1/2-2/2 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- the language of publication of the international application (under Rule 48.3(b)).
- the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- contained in the international application in written form.
- filed together with the international application in computer readable form.
- furnished subsequently to this Authority in written form.
- furnished subsequently to this Authority in computer readable form.
- The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- the description, pages:
- the claims, Nos.:
- the drawings, sheets:

EXAMINATION REPORT**

International application No. PCT/IB 03/02985

5.  This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

*(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)*

6. Additional observations, if necessary:

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Yes: Claims	1-6
	No: Claims	
Inventive step (IS)	Yes: Claims	1-6
	No: Claims	
Industrial applicability (IA)	Yes: Claims	1-6
	No: Claims	

2. Citations and explanations

**see separate sheet**

**BEST AVAILABLE COPY**

**Re Item V**

**Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The document representing the closest prior art for claim 1 is US-A-5375524.

It shows a pyrotechnical firing installation comprising a plurality of detonators, each with an electric cable comprising at least two connection conductors and a surface line to which the cable of each detonator is connected, wherein the surface line is formed by sections.

These sections are formed by distinct and separate cables that are joined together by connectors.

The installation of the present invention differs from this one in that every section is comprising a terminal or end part of the electric cable coming from a detonator and an end connector to electrically connect this terminal to the cable of the next detonator at a point of the latter defining the origin of its terminal part.

This arrangement is not disclosed in the prior art. Hence the subject matter of claim 1 is novel (Art. 33(1) and 33(2) PCT) and inventive Art. 33(3) PCT).

It provides a surface line cable by sliding one detonator terminal onto the detonator cable of another detonator, similar to daisy chaining.

EP-A-0281722 also only discloses a single surface line cable. It is reused and thus not part of the detonator cable. There are junction boxes to plug in the bundled detonator cables.

GB-A-2243500 shows a single cable with attachment spots for detonators.

Claim 2 defines a detonator comprising a terminal, that, when applied in a installation, results in the installation defined in claim 1, and hence is considered to fulfil the requirement of unity of invention according to the PCT.

GB-A-2243500 (3a) shows a detonator comprising an electric cable, the free end of which is provided with a connector, which comprises an a first part solid with the end of the cable and provided laterally with connection pins. None of the known detonators

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/IB 03/02985

would be suitable to build an installation as defined in claim 1.

The characterising features of the detonator according to claim 2 are therefore not disclosed in the prior art. Consequently the subject matter of claim 2 is novel and inventive as well.

Claims 2-6 include further preferred features of the invention, and since they are dependent on claim 2, fulfil the requirements of the PCT as well.

The invention is industrially applicable according to Art. 33(4) PCT.
